ScanSoft®

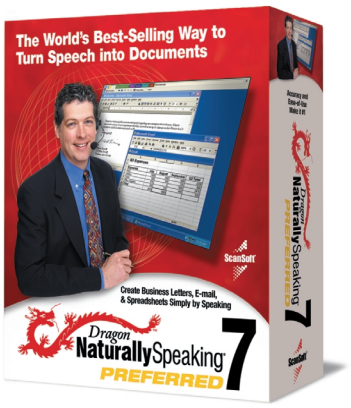
Dragon NaturallySpeaking® 7 PREFERRED

Work Faster and More Productively by Voice!

"NaturallySpeaking is an ideal fit for demanding business professionals who do a lot of dictation or need a tool for increasing productivity."

– PC Magazine Editors' Choice Award (February 26, 2002)†

ScanSoft® Dragon NaturallySpeaking® 7 Preferred speech recognition software enables small office/home office, business and educational users to create and edit documents, reports, spreadsheets, and e-mail – all by voice!



The World's Best-Selling Way to Turn Speech into Documents
Create Business Letters, E-mail, & Spreadsheets Simply by Speaking
Dragon NaturallySpeaking 7 PREFERRED

Dragon NaturallySpeaking 7 Preferred can be used with virtually any Windows®-based application, and has expanded compatibility modules for Microsoft® Word, Microsoft® Excel, Microsoft® Outlook® Express, and Corel® WordPerfect®.

Launch and control applications and menus; search and navigate Web pages by simply speaking URLs and links; create "Text and Graphics" that enable you to insert blocks of text and bitmaps – such as your name, title, and signature – into documents, all by voice. You can even use RealSpeak™ v2, Dragon NaturallySpeaking's built-in text to speech engine, to have your documents and e-mails read aloud to you for easy proofing and correction.

Dictate directly into a PC, or be productive on-the-go by dictating into a ScanSoft-certified handheld digital recorder or Pocket PC for automatic transcription when you synch to your PC. To take advantage of the many exciting benefits of Dragon NaturallySpeaking, contact ScanSoft or your local computer software retailer today!

System Requirements

- Microsoft® Windows® XP, Me, 2000, 98 SE, or Windows NT® 4.0 (with SP-6 or greater)
- Minimum PC Requirements
  - Intel® Pentium® III/500 MHz or equivalent AMD processor*

Fast and Easy to Use

Speak continuously and naturally at up to **160 words per minute**. Create letters, e-mails, and more – up to three times faster than typing! Your words appear on screen and in memos, e-mail, spreadsheets, and other documents.

Save Time – Create documents, reports & spreadsheets, send e-mail, and browse the Web – all by voice.

Get More from Your PC – Launch applications, opening files, and navigate the desktop by voice.

Maximize Your Efficiency – "Say It Your Way." There are no commands to remember. Natural Language Commands let you control the software the way you think. For example, if you say, "total the column," it adds up the figures in the column – no special commands or Microsoft® Excel formulas needed.

Increase Your Productivity – even when away from your computer. Dictate into any ScanSoft-certified handheld recorder or Pocket PC, then use Dragon NaturallySpeaking 7 Preferred to automatically transcribe your documents later.

Proofreading Made Easy

Say, "Play that back," and Dragon NaturallySpeaking will play back what you just said for easy proofreading.

Automatic Punctuation

Ideal for casual writing styles, Dragon NaturallySpeaking's Natural Punctuation feature automatically inserts periods and commas into dictated text.

Automate Commonly Used Tasks

Say, "Insert signature," and the program inserts your standard letter close, including your scanned signature or logo!

Work On the Go

Dictate into any ScanSoft-certified handheld digital recorder or Pocket PC for automatic transcription later.

Hear Your Documents

Dragon NaturallySpeaking 7 Preferred uses RealSpeak v2 text-to-speech to read your e-mail and documents aloud!

Easily Insert Contact Names

Add contact names from your Microsoft Outlook Express address book to your vocabulary!

Customize Your Vocabulary

Easily add special words to the vocabulary, such as company or product names!

Say It Your Way

No complicated commands to remember. Natural Language Commands let you control your software the way you think. For example, if you say, "Insert a four by five table here," Microsoft Word will insert a four column by five row table into your document – fast & hassle-free!

Surf the Web by Voice

Search the Web, access information, and navigate Web pages by speaking URLS and links.

Navigate Your Screen with Ease

Control the scroll bar by voice. For example, say, "Move down," and the page will scroll down.

Instantly Create Documents Simply by Speaking!

Did you know that you can create letters, spreadsheets, e-mail, or any other written document for that matter, about three times faster than ever before? What about surfing the Internet without ever touching your keyboard? Dragon NaturallySpeaking® Preferred speech recognition software lets you work faster and more efficiently. Just talk, and your words instantly and accurately appear on screen. Now you can create documents, send e-mails, browse the Web, and control your desktop – all by voice.

Typing at 50 WPM, a person produces a 3-page, 900-word document in approximately **18** minutes.

Dictating 140-160 WPM, a person produces a 3-page, 900-word document in approximately **6** minutes.

Dragon NaturallySpeaking 7 Preferred is a great way to increase output and productivity, since most people can talk faster than they type. For example, a relatively fast typist who can type 50 words per minute will produce a 900-word document in 18 minutes. Using speech recognition software, a person dictating 140-160 words per minute can produce the same 900-word document in about 6 minutes – one-third of the time. This does not include the additional time users can save using voice commands to open programs, navigate, and format by voice.

Small office/home office and educational users will quickly benefit from Dragon NaturallySpeaking® Preferred. This full-featured product comes with an array of tools that make the software accurate and easy-to-use. Get started quickly! Through a short enrollment process, you will teach the software to recognize your voice in just a few minutes. Then, use your voice to navigate your desktop – launch applications, control the scroll bar, and more – simply by speaking.

Not only will you be able to dictate into virtually all Windows®-based applications, but proofreading will be a snap. Just say, "Play that back," and the software will play back what you said so corrections can quickly be made. You can even use the Natural Punctuation feature to automatically insert commas, periods, etc. Dragon NaturallySpeaking® is designed to help you get more from your PC, and gives you the ability to multi-task, with features like the award-winning ScanSoft® RealSpeak™ text-to speech technology to read your e-mail and other documents. In addition, there are no complicated commands to remember. You can "Say It Your Way" with Natural Language Commands that let you control your software the way you think.

So what are you waiting for? Unleash the power of your computer now, with Dragon NaturallySpeaking® Preferred, and move to a higher level of productivity!
